Summary

AI-focused full-stack developer specializing in LLM-powered applications and AI SaaS. Experienced in integrating LLM APIs into production systems. Driven by a deep interest in how AI works, not just how to use it, and actively expanding into ML fundamentals, model behavior, and applied research.

Technical Skills

AI / ML: LLM API Integration, Prompt Engineering, AI-Assisted Development

Languages: Python, Java, C++, SQL

Tools & Cloud: Git, Supabase, MySQL, Vercel, Railway, Cloudinary, Pusher

Projects

ChainPass — Blockchain Ticketing Platform

Hackathon Project — WireFluid

Next.js, Solidity, Hardhat, Ethers.js, OpenZeppelin

- Built NFT-based ticketing system (ERC-721) with on-chain anti-scalping resale cap and automatic royalty splits
- Deployed end-to-end on WireFluid testnet; integrated smart contract with Next.js frontend via Ethers.js

AI Financial Co-Pilot

AI SaaS — Business Finance Intelligence

React, FastAPI, PostgreSQL, Supabase, Gemini, OpenAI

- Built real-time revenue and cash-flow dashboard with LLM-powered transaction categorization
- Developed conversational assistant for natural language financial queries using OpenAI
- Architected scalable REST APIs with FastAPI; automated AI-generated financial insights pipeline

AI Exam Generator

Full-Stack EdTech Platform

React, TypeScript, OpenRouter, Cloudinary, Resend

- Built multi-role platform (teachers + admins) with approval-gated auth, Google OAuth, and email OTP verification
- Integrated AI question generation with OCR-backed document import for scanned PDF ingestion
- Designed hierarchical question bank (class/subject/type) with full exam lifecycle — creation, preview, and print

SyncScript — Collaborative Research SaaS

Full-Stack SaaS

Next.js, TypeScript, Prisma, PostgreSQL, Pusher, Cloudinary

- Built PDF ingestion pipeline with LLM-automated APA citation generation
- Designed role-based multi-user vault system with real-time collaboration via Pusher

Hackathons & Achievements

- **Winner — IBA ProBattle Vibe Coding Challenge** (IBA CS Society): Placed 1st among multiple teams; delivered 4 functional tasks within a 4-hour time constraint
- **WireFluid'26** — Built and deployed ChainPass, a blockchain NFT ticketing dApp with on-chain anti-scalping logic
- **ProCom'26 — FAST NUCES** — Participated in Query Quest: attempted complex SQL problem set in a fully offline, 3-hour competitive environment using MySQL
- **HackFest x Datathon'26 — IBA** — Built SyncScript, collaborative research SaaS with LLM citation generation (Vibe Coding track)

Education

Sindh Madressatul Islam University

Karachi, Pakistan

BS Computer Science — CGPA: 3.4 / 4.00

2023 – Present

- **Courses:** AI, Data Structures, DBMS, OS, Information Security, Mobile Dev, Networks, OOP

Certifications

- Python for Data Science, AI & Development — IBM (Coursera)
